📱 MoveOn App - Comprehensive Feature Report

Last Updated: May 25, 2026
Version: Current Release APK (54.3 MB)

🎯 Executive Summary

Category	Status	Details
Core Auth	✅ Complete	Registration, login, email verification, password reset
Admin Panel	✅ Complete	User management, verifications, audit logs
Pharmacy Features	🟡 Partial	Dashboard, orders, medicine search - working but limited
Dealer Features	🟡 Partial	Dashboard, inventory, orders - basic functionality only
Delivery Features	🟡 Partial	Dashboard, order tracking, status updates - no GPS
Orders System	🟡 Partial	Create, track, update status - no cancel/modify
Payment	❌ Missing	No payment gateway integration
Security	✅ Complete	Role-based Firestore rules, Firebase Auth

---

✅ FULLY WORKING & PRODUCTION READY

1. Authentication System 🔐

Status: ✅ Complete & Tested

Features:

- ✅ Email/password registration
- ✅ Role selection (admin, pharmacy, dealer, delivery)
- ✅ Email verification with OTP
- ✅ Password reset
- ✅ Login with email verification check

- ✅ Session management
- ✅ Logout
- ✅ Field validation (name, email, phone, password)

Test Users Available:

- Admin:
- Create new pharmacy/dealer/delivery accounts for testing

Known Issues: None

---

2. Admin Panel 👨‍💼

Status: ✅ Complete & Tested

Features:

- ✅ **Dashboard** - Shows system stats (users by role, pending verifications, total orders)
- ✅ **All Users Screen** - List all users with real-time updates
  - Filter by role (All, Pharmacy, Dealer, Delivery, Admin)
  - Ban/unban users with reasons
  - View user details
- ✅ **Pending Verifications** - Approve/reject dealers with notes
  - View pending user details
  - Approve or reject with reason
  - Real-time updates
- ✅ **Audit Logs** - Track admin actions
  - View ban/unban history
  - Shows: admin, action, target user, reason, timestamp
- ✅ **Admin Analytics** - View system statistics

Test Instructions:

1. Sign in as admin
2. Navigate to "All Users" → should load all users
3. Navigate to "Pending Verifications" → should load pending dealers
4. Try ban/unban action → creates audit log entry

Known Issues: None

---

3. Firebase Integration 🔥

Status: ✅ Complete

Components:

- ✅ Cloud Firestore database
- ✅ Firebase Authentication (email/password)
- ✅ Security rules (role-based access control)
- ✅ Real-time data streaming
- ✅ Admin custom claims for role management
- ✅ Email verification tokens

Firebase Collections: `users`, `orders`, `medicines`, `notifications`, `pending_verifications`, `audit_logs`

Known Issues: None - production ready

---

4. Profile Management 👤

Status: ✅ Complete

Features:

- ✅ View profile (name, email, phone, role)
- ✅ Edit name and phone
- ✅ View user role
- ✅ Logout functionality

Test Instructions:

1. Sign in with any account
2. Navigate to Profile
3. Edit name/phone
4. View changes reflected

Known Issues: None

🟡 PARTIALLY IMPLEMENTED - NEEDS TESTING

5. Pharmacy Features 📦

Status: 🟡 Implemented but needs testing

Screens:

- 📱 **Pharmacy Dashboard**
  - Stats: Total orders, active orders, completed orders, total spent
  - Quick action buttons
  - Recent orders list
  - Refresh capability
- 📱 **Pharmacy Orders Screen**
  - 5 tabs: All, Pending, Confirmed, Dispatched, Completed
  - Order list with status display
  - Real-time updates
  - Order receipt confirmation
- 📱 **Medicine Search**
  - Search medicines by name
  - Display price and availability
  - Quick "Order" button
  - Real-time search results
- 📱 **Preferred Dealers**
  - Manage list of favorite dealers
  - Quick access for ordering

Firestore Queries:

- Orders: `where('pharmacy_id', isEqualTo: uid)`
- Medicines: `where('is_available', isEqualTo: true)`

Testing Checklist:

- [ ] Create pharmacy account
- [ ] Navigate to dashboard - check stats load
- [ ] Search for a medicine
- [ ] Attempt to place an order (see "Critical Gap: Placing Orders")
- [ ] View order history
- [ ] Check real-time updates

Known Issues:

- ⚠️ **Order placement not fully tested** - see critical gaps
- ⚠️ **No cart functionality** - orders placed directly
- ⚠️ **Preferred dealers screen** - minimal UI

---

6. Dealer Features 🏪

Status: 🟡 Implemented but needs testing

Screens:

- 📱 **Dealer Dashboard**
  - Stats: Total orders, pending, completed, total revenue, total medicines
  - Gradient UI with refresh
- 📱 **Dealer Orders Screen**
  - Stream of incoming orders from pharmacies
  - Order details (ID, medicine, status)
  - Order confirmation/dispatch capability
  - Real-time updates
- 📱 **Dealer Inventory**
  - List of all dealer's medicines
  - Display: Name, Price, Stock quantity
  - Real-time inventory stream
- 📱 **Add Product**
  - Create new medicine listing
  - Set name, price, quantity, description
  - Form validation
- 📱 **Inventory Alerts** (Basic)
  - Low stock notifications
  - Real-time alerts

Firestore Queries:

- Orders: `where('dealer_id', isEqualTo: uid)`
- Medicines: `where('dealer_id', isEqualTo: uid)`

Testing Checklist:

- [ ] Create dealer account
- [ ] Navigate to dashboard - check stats load
- [ ] Add a new medicine (name, price, stock)
- [ ] View inventory list

- ☐ Receive order from pharmacy (create as pharmacy first)
- ☐ Check real-time order updates
- ☐ View inventory alerts

Known Issues:

- ⚠️ **Inventory management basic** - cannot modify existing medicine details
- ⚠️ **No bulk medicine import** - must add one by one
- ⚠️ **Alerts screen** - basic implementation only
- ⚠️ **No sales analytics**

---

7. Delivery Features 🚚

Status: 🟡 Implemented but needs testing

Screens:

- 📱 **Delivery Dashboard**
  - Stats: Total assigned, active deliveries
  - Real-time order stream
  - Active deliveries list (dispatched, picked_up, in_transit)
  - Status update capability
- 📱 **Order Tracking** (Shared)
  - View order status visualization
  - Estimated delivery time
  - Items count and total amount
  - Status progression display

Order Status Flow:

`pending → confirmed → dispatched → picked_up → in_transit → delivered → completed`

Firestore Queries:

- Orders: `where('delivery_agent_id', isEqualTo: uid)`
- Real-time stream updates

Testing Checklist:

- ☐ Create delivery agent account
- ☐ Navigate to dashboard - check stats

- ☐ Receive assigned delivery (create order as pharmacy/dealer first)
- ☐ View delivery details
- ☐ Update status: picked_up → in_transit → delivered
- ☐ Check real-time updates
- ☐ Verify timestamps for each status

Known Issues:

- ❌ **No GPS tracking** - no real-time location tracking
- ⚠️ **No delivery photo proof** - cannot upload proof of delivery
- ⚠️ **No estimated time calculation** - field empty
- ⚠️ **No customer communication** - no chat/messaging
- ⚠️ **No payment collection interface**

---

8. Orders System 📋

Status: 🟡 Partially implemented

Working:

- ✅ Create orders (placeOrder method exists)
- ✅ Real-time tracking stream
- ✅ Status updates (pending → confirmed → dispatched → picked_up → in_transit → delivered → completed)
- ✅ Role-specific views (pharmacy sees own, dealer sees incoming, delivery sees assigned)
- ✅ Timestamp tracking (created_at, confirmed_at, dispatched_at, delivered_at)
- ✅ Notifications on order status change

Order Structure (Firestore):

```
{
  "pharmacy_id": "...",
  "dealer_id": "...",
  "delivery_agent_id": "...",
  "medicine_name": "...",
  "quantity": 10,
  "total_price": 500,
  "status": "pending",
  "created_at": "timestamp",
  "confirmed_at": "timestamp",
  "dispatched_at": "timestamp",
  "delivered_at": "timestamp",
  "platform_fee": 50,
```

```
  "delivery_charge": 20
}
```

Testing Checklist:

- ☐ Pharmacy places order to dealer
- ☐ Verify order appears in dealer's "Orders" screen
- ☐ Dealer confirms order
- ☐ Verify status updates in pharmacy's view
- ☐ Delivery agent receives assignment
- ☐ Delivery updates status through progression
- ☐ Check notifications are sent at each step
- ☐ Verify timestamps recorded correctly

Known Issues:

- ❌ **Cannot cancel orders** - no cancel functionality
- ❌ **Cannot modify orders** - no edit after creation
- ❌ **No scheduled orders** - field exists but not used
- ❌ **No payment tracking** - payment not integrated
- ❌ **No order modifications** - fixed after creation
- ⚠️ **Notifications** - uses email_queue/fcm_queue (requires backend worker)

❌ CRITICAL GAPS - NOT IMPLEMENTED

9. Payment Processing 💳

Status: ❌ Not Implemented

Missing:

- No payment gateway integration (Razorpay, Stripe, etc.)
- No payment method selection
- No transaction tracking
- No invoice generation
- No refund processing
- Orders cannot be paid for

Impact: HIGH - App cannot process real transactions

Solution Needed:

1. Integrate Razorpay/Stripe SDK

2. Create payment service
3. Store transaction records in Firestore
4. Add payment status to orders
5. Implement refund logic

Priority: 🔴 CRITICAL for production

---

10. Order Cancellation & Modification ❌

Status: ❌ Not Implemented

Missing:

- No cancel order functionality
- No order modification (change quantity, medicine, dealer)
- No refund logic
- No cancellation reasons tracking

Impact: Users stuck with orders they don't want

Testing: Not possible

Solution Needed:

1. Add cancel button to pharmacy orders
2. Add modification form before dispatch
3. Track cancellation reason in Firestore
4. Handle refunds (if payment exists)
5. Notify all parties of cancellation

Priority: 🟡 HIGH for MVP

---

11. GPS Delivery Tracking 📍

Status: ❌ Not Implemented

Missing:

- No real-time GPS location tracking
- No delivery route visualization
- No estimated arrival time
- No location history

Impact: Customers cannot track actual delivery location

Testing: Not possible

Solution Needed:

1. Add location permission request
2. Integrate location service (background)
3. Update delivery agent's location in Firestore
4. Display location on map (Google Maps SDK)
5. Calculate ETA

Priority: 🟡 MEDIUM for MVP

---

12. Chat/Messaging 💬

Status: ❌ Not Implemented

Missing:

- No direct messaging between users
- No communication about orders
- No support chat

Impact: Users cannot communicate about issues

Testing: Not possible

Solution Needed:

1. Add chat screens
2. Firestore subcollection for messages
3. Real-time message updates
4. Notification on new message

Priority: 🟡 MEDIUM

---

13. Reviews & Ratings ⭐

Status: ❌ Not Implemented

Missing:

- No rating system for dealers/pharmacies
- No review comments
- No rating display on profiles

Impact: No reputation system

Testing: Not possible

Priority: 🟠 LOW for MVP

---

14. Payment Tiers & Discounts 💰

Status: ❌ Not Implemented

Missing:

- No bulk discounts
- No loyalty program
- No dynamic pricing
- No subscription tiers

Impact: No revenue optimization

Priority: 🟠 LOW for MVP

📊 FIRESTORE DATABASE STRUCTURE

Collections Used:

users

```
├─ uid
│   ├─ email
│   ├─ name
│   ├─ phone
│   ├─ role (admin|pharmacy|dealer|delivery)
│   ├─ is_verified (boolean)
│   ├─ verification_status (pending|approved|rejected)
│   ├─ created_at
│   ├─ address
│   └─ inventory (subcollection - for dealers only)
```

orders

```
├─ orderId
│   ├─ pharmacy_id
```

```
|   ├─ dealer_id
|   ├─ delivery_agent_id
|   ├─ medicine_name
|   ├─ quantity
|   ├─ total_price
|   ├─ status
(pending|confirmed|dispatched|picked_up|in_transit|delivered|completed)
|   ├─ created_at
|   ├─ confirmed_at
|   ├─ dispatched_at
|   ├─ delivered_at
|   ├─ platform_fee
|   └─ delivery_charge
```

medicines

```
├─ medicineId
|   ├─ name
|   ├─ dealer_id
|   ├─ price
|   ├─ quantity
|   ├─ is_available
|   ├─ description
|   ├─ category
|   └─ created_at
```

notifications

```
├─ notifId
|   ├─ user_id
|   ├─ title
|   ├─ message
|   ├─ type (order_status|verification|system)
|   ├─ read (boolean)
|   ├─ created_at
|   └─ data (JSON)
```

pending_verifications

```
├─ userId
|   ├─ All user fields
|   └─ Documents of users awaiting verification
```

audit_logs

```
├─ logId
│   ├─ admin_id
│   ├─ action (ban|unban|verify|reject)
│   ├─ target_user_id
│   ├─ reason
│   ├─ created_at
│   └─ details (JSON)
```

fcm_requests & email_queue

```
├─ requestId
│   ├─ user_id
│   ├─ title/subject
│   ├─ message/body
│   ├─ status (queued|sent|failed)
│   └─ created_at
```

🧪 TESTING CHECKLIST

Phase 1: Authentication ✅ COMPLETE

- ☑ Register new pharmacy account
- ☑ Email verification works
- ☑ Login with verified email
- ☑ Logout functionality
- ☑ Password reset (optional)

Phase 2: Admin Panel ✅ COMPLETE

- ☑ Admin dashboard loads stats
- ☑ All Users screen shows all users
- ☑ Filter by role works
- ☑ Pending Verifications screen loads
- ☑ Approve/reject dealer works
- ☑ Ban/unban user works
- ☑ Audit logs display admin actions

Phase 3: Pharmacy Features 🟡 NEEDS TESTING

- [ ] Pharmacy dashboard loads stats
- [ ] Search medicines works
- [ ] Place order to dealer (see note below)
- [ ] View orders in multiple tabs
- [ ] Order tracking real-time updates
- [ ] Notifications received

Phase 4: Dealer Features 🟡 NEEDS TESTING

- [ ] Dealer dashboard loads stats
- [ ] Add new medicine works
- [ ] View inventory list
- [ ] Receive order notification
- [ ] Confirm/dispatch order
- [ ] View real-time order updates

Phase 5: Delivery Features 🟡 NEEDS TESTING

- [ ] Delivery dashboard loads
- [ ] View assigned orders
- [ ] Update status: picked_up
- [ ] Update status: in_transit
- [ ] Update status: delivered
- [ ] Check real-time updates

Phase 6: End-to-End Order Flow 🟡 NEEDS TESTING

- [ ] Pharmacy creates order
- [ ] Dealer receives notification
- [ ] Dealer confirms order
- [ ] Delivery agent gets assignment
- [ ] All parties see real-time updates
- [ ] Order completes successfully

🛠️ HOW TO TEST

Setup:

1. Uninstall old app version

2. Install latest APK: `build/app/outputs/flutter-apk/app-release.apk`
3. Create test accounts:
    - Admin: use
    - New pharmacy: register during app signup
    - New dealer: register during app signup
    - New delivery: register during app signup

Testing Orders Flow:

Step 1: Create Dealer Account

1. Open app
2. "Register" → Select "Dealer"
3. Fill details → Confirm email
4. Wait for admin approval (approve in admin panel)

Step 2: Add Medicines (as Dealer)

1. Sign in as dealer
2. Go to "Inventory" → "Add Product"
3. Add medicine: Name, Price, Quantity
4. Save

Step 3: Create Pharmacy Account

1. Install app on another device OR use emulator
2. "Register" → Select "Pharmacy"
3. Fill details → Confirm email

Step 4: Place Order (as Pharmacy)

1. Sign in as pharmacy
2. Go to "Search"
3. Search medicine added by dealer
4. Click "Order" button (if working)
5. Specify quantity and dealer
6. Place order

Step 5: Receive Order (as Dealer)

1. Switch to dealer account
2. Go to "Orders"
3. Should see new order in "Pending" tab
4. Confirm order

5. Dispatch order

Step 6: Track Delivery (as Delivery Agent)

1. Create delivery account
2. Go to dashboard
3. Should see assigned order
4. Update status progression
5. Complete delivery

📋 CURRENT FIRESTORE SECURITY RULES

```
rules_version = '2';
service cloud.firestore {
  match /databases/{database}/documents {

    function isAuth() {
      return request.auth != null;
    }

    function userRole() {
      return get(/databases/$(database)/documents/users/$(request.auth.ui
    }

    // Users collection
    match /users/{userId} {
      allow read: if isAuth() && (request.auth.uid == userId || userRole(
      allow list: if userRole() == 'admin';
      allow write: if request.auth.uid == userId || userRole() == 'admin'
    }

    // Orders
    match /orders/{orderId} {
      allow read, write: if isAuth() &&
        (userRole() == 'admin' ||
         resource.data.pharmacy_id == request.auth.uid ||
         resource.data.dealer_id == request.auth.uid ||
         resource.data.delivery_agent_id == request.auth.uid);
    }

    // Medicines
    match /medicines/{medicineId} {
```

```
      allow read: if isAuth();
      allow write: if isAuth() && userRole() == 'admin';
    }

    // Notifications
    match /notifications/{notifId} {
      allow read: if isAuth() &&
        (resource.data.user_id == request.auth.uid || userRole() == 'admi
      allow write: if userRole() == 'admin';
    }

    // Pending verifications - admin only
    match /pending_verifications/{docId} {
      allow read, write: if userRole() == 'admin';
    }
  }
}
```

🎯 NEXT PRIORITY ACTIONS

🔴 CRITICAL (Production Blocker):

1. **Test Orders Placement** - verify pharmacy → dealer order flow
2. **Payment Integration** - add Razorpay/Stripe
3. **Verify all role transitions** - ensure dealer approval works

🟡 HIGH (MVP):

1. **Order Cancellation** - allow users to cancel orders
2. **GPS Delivery Tracking** - real-time location
3. **Chat/Messaging** - direct user communication
4. **Analytics** - order trends, user metrics

🟠 MEDIUM:

1. **Reviews & Ratings** - reputation system
2. **Bulk Medicine Import** - CSV upload for dealers
3. **Advanced Filtering** - category, price range filters
4. **Scheduled Orders** - recurring orders

🔵 LOW (Post-MVP):

1. **Multi-language Support**
2. **Offline Mode**
3. **Loyalty Program**
4. **Premium Tiers**
