CAREER OBJECTIVE

Seeking an entry-level Cybersecurity Engineering role to apply strong academic foundation and proven passion for secure software development. With hands-on experience in penetration testing, CTF competitions, and ethical hacking, I am eager to contribute to innovative security projects while collaborating with dynamic teams. Committed to continuous learning and leveraging technical expertise to develop robust and secure solutions.

COMPETITIVE ACHIEVEMENTS AND CTF EXPERIENCE

- 9th Place Winner, CodeVinci CTF 2026 - VOID_Walkers Team | 24-hour cybersecurity competition involving network analysis, cryptography, and vulnerability exploitation
- Dark-CTF 2026 Participant (Crack-On Community) | Competed against 200+ teams in comprehensive security challenges | Dark-CTF Writeups Repository - Published detailed technical writeups demonstrating exploitation techniques
- 2nd Place Winner, Avanya-2K25 Hackathon (Anurag University) - AI Bias Monitoring System | Developed real-time bias detection and visualization system using Python, Flask, and ML algorithms
- Active Bug Bounty Participant - Engaged in responsible disclosure and vulnerability research through competitive CTF platforms

TECHNICAL SKILLS

Cybersecurity Tools: Wireshark, Metasploit, Burp Suite, Network forensics, Packet analysis, Kali Linux, Ubuntu penetration testing

Programming Languages: Python (Advanced), Java, C/C++, JavaScript, HTML/CSS, SQL, Ruby, .NET

Frameworks and Tools: Flask, React.js, Machine Learning (scikit-learn, TensorFlow), OpenCV, MySQL

Specializations: Ethical Hacking, Penetration Testing, Network Security, Cryptography, Cloud Computing (AWS), Data Analysis, Power BI, Problem Solving

EDUCATION

St. Peter's Engineering College, Hyderabad (Expected: April 2027)

Bachelor of Technology: Computer Science and Engineering (Cybersecurity Specialization)

CGPA: 73.45/100

Sankethika Vidya Parshith (2019-2022)

Diploma in Electrical and Electronics Engineering

CGPA: 72.4/100

PROFESSIONAL EXPERIENCE

Cybersecurity Intern, Redynox (45 days)

- Conducted security assessments and vulnerability analysis on web and network applications
- Performed penetration testing using industry-standard tools including Metasploit and Burp Suite
- Documented security findings and remediation recommendations with detailed technical reports
- Gained practical experience in incident response and security best practices implementation

Internship, APSPDCL (6 months, Diploma Program)

- Monitored power grid security systems and network infrastructure
- Learned network infrastructure monitoring and incident response procedures

AI and Transformative Learning Internship, TechSaksham (Microsoft and SAP CSR Initiative)

- Participated in AI/ML training and hands-on project development
- Implemented by Edunet Foundation, focused on emerging technology skills and industry preparation

PROJECTS

AI Voice Detection System (Audio Forensics)

- Developed Python-based ML tool using librosa to detect AI-generated and morphed audio with 87% accuracy
- Deployed as Flask web application for real-time audio forensics analysis
- Impact: Enables detection of voice spoofing attacks and deepfake audio in security applications | View Project

Attendance Management System using Face Recognition

- Python application leveraging OpenCV for real-time face detection and recognition with Tkinter GUI
- Integrated MySQL database for secure attendance record management and CSV report generation
- Result: Reduced manual attendance time by 90% with 95% face recognition accuracy across 200+ students | View Project

Integrated Cybersecurity Education Toolkit (Phishing Tool)

- Built hands-on educational platform demonstrating phishing attack vectors and defense mechanisms
- Components: Suspicious link analyzer tool, realistic phishing demo server, and security awareness module
- Outcome: Empowers non-technical users to identify phishing threats and implement security best practices | View Project

Personal Data Breach Checker (Web Application)

- Developed web/mobile app integrating HaveIBeenPwned API to check email exposure in data breaches

- Features: Breach detail reporting, remediation recommendations, 2FA security guidance
- Impact: Raises cybersecurity awareness and encourages implementation of strong passwords and 2FA | View Project

Sentiment Analysis on Movie Reviews (Machine Learning)

- Implemented LinearSVC classifier to classify IMDB movie reviews as positive/negative with NLP preprocessing
- Applied TF-IDF vectorization and achieved 85% classification accuracy on 50,000+ reviews | View Project

Aegis - AI Bias Monitoring System (Hackathon Winner)

- Developed real-time AI bias detection system with live CUI dashboard and Flask web interface
- Features: Bias simulation environment, live monitoring, instant analysis of biased decision-making
- Achievement: 2nd Place Winner at Avanya-2K25 Hackathon for innovative AI ethics approach | View Project

Svastha - Healthcare Data Management App (In Progress)

- Mobile app consolidating medical records: prescriptions, test reports, imaging, medical bills, doctor history
- Features: Secure sharing with healthcare providers, medication reminders, appointment tracking | View Project

CERTIFICATIONS AND PROFESSIONAL ACHIEVEMENTS

Cybersecurity Certifications

- Certified Ethical Hacker (CEH) - Internshala
- Google Foundation of Cybersecurity - Coursera
- Cisco Introduction to Cybersecurity
- Cisco Ethical Hacking
- University of Maryland Cybersecurity for Everyone - Coursera

Programming and Data Certifications

- HackerRank: Software Engineer Intermediate, Java, Python, Problem Solving Certifications
- Java Data Structures Masterclass - Udemy
- Python Certification - Datapro
- C and C++ Certifications - Datapro
- Advanced Java Certification - Datapro

Cloud and Data Analysis Certifications

- AWS Solutions Architecture Job Simulation - Amazon
- Data Analysis and Visualization with Power BI - Microsoft (Coursera)
- Data Analysis with Python - IBM (Coursera)
- Data Visualization with Tableau - University of California

Emerging Technologies and Specialized Training

- AI Skills Passport - EY and Microsoft
- Mastering Python - Infosys
- Java Explorer Batch - Oracle University
- MySQL Database Administration - HackerRank

LANGUAGES

- English - Professional (Fluent)
- Telugu - Native
- Hindi - Conversational
